HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

Response to Amendment

Applicant's amendments to the specification and claims, filed 1/24/2011, are accepted and appreciated by the examiner. In response all previous objections and rejections are withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brent Johnson on 3/23/2011.

The application has been amended as follows:

Claim 1 is amended as follows:

"1. An electrical impedance tomography (EIT) data processing system, for acquiring and processing data from two-phase flows, comprising a dual-plane sensor, a plurality of digital signal processing modules configured in a data pipeline processing arrangement and a plurality of data acquisition subsystems in communication with a first one of said plurality of digital signal processing modules;

wherein at least one of the data acquisition subsystems includes an over-zero switch comprising: at least one multiplexer and at least one flip-flop;

~~the at least one multiplexer and at least one flip-flop;~~

the at least one ~~multiplexor~~ multiplexer arranged to supply a sinusoidal signal to a selected one of a plurality of channels of the dual- plane sensor according to an output of the at least one flip-flop;

the at least one flip-flop arranged to receive a synchronization signal that has the same over-zero point as the sinusoidal signal, the synchronization signal causing the at least one flip-flop to output a channel selection signal ~~provided to the at least one flip-flop to output a channel selection signal provided to the at least one flip-flop.~~

Claim 26 is amended as follows:

“26. A non-transitory recording medium having recorded thereon computer implementable instructions for performing the method of claim 24 ~~or claim 25.~~”

Allowable Subject Matter

Claims 1-22, 24 and 26 are allowed.

The following is an examiner's statement of reasons for allowance:

Although the prior art of record shows control schemes for EIT, they do not disclose or fairly suggest:

A “multiplexer arranged to supply a sinusoidal signal to a selected one of a plurality of channels of the dual- plane sensor according to an output of the at least one flip-flop; the at least one flip-flop arranged to receive a synchronization signal that has the same over-zero point as the sinusoidal signal, the synchronization signal causing the at least one flip-flop to output a channel selection signal” as claimed.

New prior art Spivey (US pat 5417218) discloses multiplexers driving tomography elements, but they are not synchronized with respect to an over-zero point, nor are their outputs applied to a dual-plane sensor.

New prior art Gordon (US pat 4135247) also discloses multiplexers driving tomography elements but similarly does not discuss synchronization, over-zero points, or dual-plane sensors.

Thus these elements, in combination with, the other limitations of the claim, are neither anticipated by nor obvious in view of the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JONATHAN C. TEIXEIRA MOFFAT whose telephone number is (571)272-2255. The examiner can normally be reached on Mon-Fri, from 7:00-4:00.
